

American Hearth Classics – New Sample Display R

Included:

Samples	6 – 20
Hanging Hooks (two per sample)	12 – 40
20"x40" Frame W/Pegboard Attached	2
The bottom of each will have two holes	
20"x40" Pegboard Pieces	2
20"x20" Pegboard Piece	1
6"x20" Braces	2
Assembly Screws (all the same)	25
Casters	4
Sign	1
Sign Holder	2

Step 1 (Best with two people) – Place both frames w/pegboard attached on their side, make sure the holes for both are on the same end. Take one of the full 20x40 pieces of pegboard, align on one side at top and bottom and along edge and use three (3) screw to attach this edge to the frame it is resting on. Repeat on the other side.

Step 2 – Carefully stand rack up and lay it back down with the newly attached piece now flat on the floor, attach the other 20x40 pegboard piece in the same manner as described in step one.

Step 3 (works best with two people or a clamp) – Stand the rack on end so that the bottom (end with holes in both frames are up, install one of the 6x20 braces from side to side centered between the frame, making sure the brace has the widest part up and is flush with the pegboard, secure with two screws on each end.

Step 4 – Insert the caster stems into the holes in the frame

Step 5 – Repeat step 3 to install the second brace

Step 6 – Place the 20x20 pegboard piece on, center it and secure with six screws, one in each corner and two into the top brace

Step 7 – place the sign holder(s) on the display sign, remove the protective layer off the two-sided tape and press sign on to the top of the rack, best if it parallel to one of the four sides and close enough to one edge to leave room on top for brochures

Step 8 – hang samples using hooks provided, they can be placed as desired, in most cases all samples will fit on three sides if you would like the rack tight to a wall.
