

AMERICAN HEARTH CLASSICS

Floor Pads vs. Wall Pads

Can a floor pad be used as a wall pad?

Thinset is used as the bonding compound for floor pads.

[Thinset](#), is a modified mortar, for floor pads reduces cracking from heavy stoves and bonds the tile to the substrate.

Clear RTV Silicone is the bonding compound used for wall pads.

[RTV silicone](#) will stay flexible it adheres the tile to the pad to prevent gravity from causing the tiles to fall off

Please do not use a floor pad as a wall pad. You can use a wall pad for a floor pad.
